# COMMENTARY

## KEY HIGHLIGHTS

- The well-defined strategy delivered a marked improvement in financial performance
- Strong volume demand, improved pricing, and enhanced channel and product mixes
- Relentless focus on cost management, agricultural performance and operational efficiencies across the entire value chain
- Lower commodity input costs aiding reduction in feed costs
- Good margin recovery in external animal feed sales
- Continued focus on renewable energy implementation

## INTRODUCTION

Rainbow Chicken Limited (“Rainbow” or “the Company” or “the Group”) is a fully integrated broiler producer that breeds and rears poultry livestock which it feeds from its own animal feed mills. The Company plays a significant role in the national supply of chicken, overseeing every stage of production from farm to fork. Rainbow produces, distributes, and markets superior quality fresh, frozen, value-added, and further-processed chicken, whilst also producing industry-leading animal feed.

The Company’s forward-looking growth strategy continues to deliver improvements across agricultural key performance indicators, while also optimising animal feed production. Within this strategy, processing facility upgrades aim to improve overall efficiency and cost performance, whilst simultaneously reducing biosecurity risks to the business. Rainbow operates within a highly cyclical and commoditised industry that requires continual reinforcement of the long-term strategy to ensure business continuity that is centred on delivering sustainable profitability.

# FINANCIAL REVIEW

## GROUP RESULTS

### INCOME STATEMENT

Revenue increased by 11.3% to R8,8 billion (December 2024: R7,9 billion) for the six months ended 28 December 2025 (“current period”), positively impacted by stronger demand, enhanced channel and product mixes and improved pricing.

The ongoing implementation of Rainbow’s growth strategy, supported by strong demand for chicken, lower input prices, and the strengthening of the South African Rand versus the US Dollar, have contributed to an improvement in profitability over the first half of the 2026 financial year.

This has translated into an improvement in the EBITDA margin from 7.4% to 12.0%.

	Unaudited December 2025 R'000	Unaudited December 2024 R'000	Movement %	Audited June 2025 R'000
Revenue	8 786 983	7 894 686	11.3%	15 838 044
EBITDA	1 053 898	581 131	81.4%	1 058 677
EBITDA margin	12.0%	7.4%	4.6 pts	6.7%
Operating profit (EBIT)	865 759	415 813	108.2%	696 686
Operating profit margin (EBIT)	9.9%	5.3%	4.6 pts	4.4%

EBITDA includes a fair value loss of R1,6 million related to the Group’s commodity derivative positions (December 2024: gain of R47,1 million). The movement relative to the previous period is a consequence of the impact of the strengthening of the Rand versus the US Dollar, together with the softer maize and soyabean meal market prices on the Group’s procured positions.

Net finance income has improved relative to the comparative period by R23,2 million mainly due to the strong cash position resulting from Rainbow’s ongoing improved profitability.

Rainbow’s effective tax rate decreased to 27.3% (December 2024: 28.0%).

Non-controlling interests (“NCI”) comprise of the 50% share of profits or losses attributable to external shareholders in Rainbow’s Waste-to-Value (“W2V”) Division, Matzonox Proprietary Limited. In accordance with income-statement presentation requirements, 50% of profits or losses after tax is allocated to these shareholders under the non-controlling interest line. For the current period, losses attributable to non-controlling interests increased by R5,6 million compared to the prior period mainly due to the non-renewal of the contract for the sale of green gas certificates and additional interest incurred.

### STATEMENT OF FINANCIAL POSITION

Property, plant and equipment, right-of-use assets, intangible assets and investment property increased by R106,4 million since the commencement of the financial year. The movement primarily reflects capital expenditure of R296,4 million, partially offset by depreciation and amortisation charges amounting to R188,1 million.

Over the six-month period, Rainbow continued to focus on strengthening its core asset base through disciplined capital investment aimed at improving operational efficiency, increasing capacity, and mitigating risk. Replacement capital expenditure amounted to R287,5 million, while expansion-related capital expenditure totalled R2,0 million. Furthermore, capital commitments amounting to R123,3 million have been committed but remained unspent at period end, while an additional R248,0 million has been approved and is yet to be contracted.

Key capital initiatives during the period included enhancements to processing and farming equipment, bio-security investments to control Avian Influenza, the upgrade of the grandparent hatchery, investment into water filtration systems and the commencement of phase two of the IT separation project (as part of Rainbow’s transition from RCL FOODS’ platforms).

Water and energy security remain key strategic focus areas for the business. Accordingly, capital investments are being planned over the next five years to secure reliable and affordable supply, while minimising operational disruptions and supporting business continuity.

Rainbow continues to focus on effective management of its working capital. The higher net working capital since June 2025 is primarily driven by higher trade receivables as a result of revenue growth in the current period and the partial earlier receipt from Vector Logistics at the end of the June 2025 financial year.

Total interest-bearing and non-interest-bearing liabilities for the Group reduced by R87,7 million relative to December 2024, mainly due to the settlement of IFRS 16 lease liabilities.

## FINANCIAL REVIEW CONTINUED

### CASH FLOW

Cash and cash equivalents increased to R1,7 billion (December 2024: R970,8 million), although cash generated by operating activities reduced relative to the prior period.

Net cash inflow from operating activities amounted to R190,5 million (December 2024: R755,1 million). The reduction of R564,7 million compared to the prior period was mainly due to the timing of working capital movements as referenced above. Contributing to the decrease was the payment of the first cash dividend payment of R178,9 million relating to the 2025 financial year.

Net cash outflow from investing activities for the current period amounted to R289,4 million, primarily due to capital expenditure investments.

Net cash outflow from financing activities was in line with the prior period and mainly comprised of IFRS 16 lease payments as referenced above.

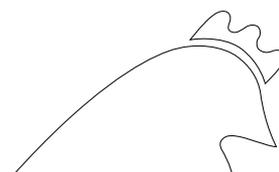

### RETURN ON INVESTED CAPITAL (“ROIC”)

	Unaudited December 2025	Unaudited December 2024	Movement	Audited June 2025
ROIC	22.6%	12.6%	10 ppts	16.3%

ROIC is a key performance measure used by Rainbow to assess the effectiveness and efficiency of the Group's capital allocation. ROIC is calculated as the rolling 12-month net operating profit after tax divided by invested capital at the end of the period. The improved ROIC is mainly attributable to improved performance and prudent capital allocation.

### DIVIDEND UPDATE

The Board of Directors has declared an interim gross cash dividend of 15.0 cents (December 2024: nil) per ordinary share for the period ended 28 December 2025. The Board remains committed to maintaining a consistent and responsible dividend policy. The dividend declarations are guided by a range of considerations, including the Group's financial performance, the overall statement of financial position, level of gearing, capital requirements, strategic objectives and available cash.

# SEGMENTAL REVIEW

Globally, competitiveness in the poultry sector is increasingly defined by technical efficiency, productivity and the ability to respond to evolving consumer and trade dynamics. A comprehensive benchmark by Wageningen University & Research, conducted in collaboration with Bureau for Food and Agricultural Policy (“BFAP”), confirmed that South Africa’s broiler industry is internationally competitive, combining strong technical efficiency with a cost position that benchmarks ahead of the United States and major European producers, and is exceeded only by Brazil. These outcomes reflect sustained improvements in genetics, production practices and operational discipline.

Within South Africa, chicken remains the most widely consumed protein and continues to play a critical role in national food security, particularly in an environment of constrained consumer spending and volatility in red meat and pork pricing following the outbreak of foot-and-mouth disease and swine-flu.

Against this backdrop, Rainbow remains focused on delivering exceptional value through innovative products and an optimised product mix that is responsive to market trends, brand aspirations, and customer and consumer needs. The Group’s continued emphasis on internally controlled and well-managed operational fundamentals positions Rainbow to respond effectively to evolving demand and to support sustainable performance over time.

## CHICKEN DIVISION

Revenue increased by 11.5% whilst EBITDA increased by 126.2%. This positive movement was driven primarily by strong demand, ongoing product and channel diversification aimed at serving a growing customer base, relentless focus on agricultural and operational performance, and further supported by the reduction in feed input costs.

	Unaudited December 2025 R'000	Unaudited December 2024 R'000	Movement %	Audited June 2025 R'000
Revenue	7 753 827	6 955 815	11.5%	13 969 395
EBITDA	819 655	362 419	126.2%	685 229
EBITDA margin	10.6%	5.2%	5.4 ppts	4.9%
Operating profit (EBIT)	669 743	235 900	183.9%	434 468
Operating profit margin (EBIT)	8.6%	3.4%	5.2 ppts	3.1%

Over the past two years, Rainbow has doubled its processing capacity at the Hammarsdale facility, introduced new technologies and continued to improve its core asset base.

The integrated value chain also enables Rainbow to support the small-scale emerging farmers through the supply of affordable, high-quality day-old chicks and feed. By shortening the supply chain, Rainbow empowers emerging farmers and supports inclusive growth to help build sustainable businesses that can participate more fully in the industry. These efforts reflect the Company’s broader vision for social impact within the poultry sector.

## ANIMAL FEED DIVISION

Rainbow’s growth strategy for the Animal Feed Division is firmly anchored in supporting the expanding internal requirements of the Chicken Division, thereby reinforcing the Group’s vertically integrated operating model. In parallel, a meaningful portion of the total feed production is supplied to external customers, positioning the division as a business of scale and competitive growth platform in its own right. The external feed business is underpinned by a strong value proposition focused on high-quality feed, consistent performance and technical reliability, which continues to drive customer retention, market penetration and sustainable earnings growth. Feed costs remain the largest component of poultry production costs and, therefore, have a significant impact on the overall competitiveness of the business.

Revenue increased by 1.7% compared to the prior period, driven mainly by higher volumes across internal and external channels, although selling prices were marginally lower than the prior period, largely reflective of the reduced commodity input costs. Ongoing focus on operational efficiencies, together with strategic raw material procurement, resulted in an incremental improvement in EBITDA.

	Unaudited December 2025 R'000	Unaudited December 2024 R'000	Movement %	Audited June 2025 R'000
Revenue	3 688 170	3 626 808	1.7%	7 389 236
EBITDA	212 581	211 764	0.4%	329 199
EBITDA margin	5.8%	5.8%	–	4.5%
Operating profit (EBIT)	189 753	189 292	0.2%	284 947
Operating profit margin (EBIT)	5.1%	5.2%	(0.1 ppts)	3.9%

Rainbow remains committed to sustainable growth by maintaining acceptable margins, while enhancing customer value through superior feed performance, strengthened service delivery, and competitive pricing.

## SEGMENTAL REVIEW CONTINUED

### WASTE-TO-VALUE DIVISION (“W2V”)

Rainbow’s Waste-to-Value Division plays a strategic role in converting waste from poultry farms and processing plants into renewable energy, directly supporting the Group’s sustainability and cost-efficiency goals.

	Unaudited December 2025 R’000	Unaudited December 2024 R’000	Movement %	Audited June 2025 R’000
Revenue	55 930	56 641	(1.3%)	102 359
EBITDA	20 425	22 962	(11.0%)	37 358
EBITDA margin	36.5%	40.5%	(4.0 ppts)	36.5%
Operating profit (EBIT)	5 026	6 635	(24.3%)	(29 620)
Operating profit margin (EBIT)	9.0%	11.7%	(2.7 ppts)	(28.9%)

Revenue declined by 1.3% and EBITDA by 11.0% compared to the prior period. The decreases are primarily attributable to the non-renewal of the contract for the sale of green gas certificates, partially offset by additional revenue earned on electricity and water generation. Whilst the Worcester W2V plant continues to produce acceptable results, the Rustenburg W2V operational issues remains a key focus area for management.

During the current period, regulatory notices relating to odour management were issued by the local municipality to the Rustenburg W2V operations and processing facilities. Various initiatives are currently being investigated to mitigate the odour, and the matter is being addressed through ongoing engagement with the relevant municipal authorities.

## POULTRY INDUSTRY MATTERS

Progress has been made on **South Africa’s 2019 Poultry Master Plan**, developed in close partnership with Government and several industry stakeholders to expand the market and grow consumption. There is however still much and urgent work to be done to enable and support meaningful exports.

Significant uncertainty remains regarding the **African Growth and Opportunity Act (“AGOA”)** which has now been reauthorised by the United States for a limited period ending 31 December 2026. The concern from the industry is that a 72 000 ton chicken quota, exempted from anti-dumping duties remains available to the United States, while South African industries do not benefit from AGOA anymore, given the more recent and volatile tariff environment.

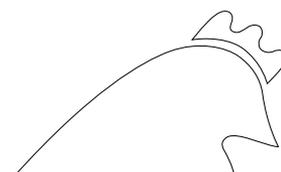

Rail recovery and investment were reinforced in the Budget Speech through funding commitments and infrastructure allocations, which we welcome as an important step in strengthening **South Africa’s rail logistics** network. In terms of raw materials for poultry feed, the rail system is not yet able to provide a distribution solution that is more cost-effective or efficient than road transport. It therefore remains essential that the country’s freight logistics network is prioritised.

The overall cost and conditions of the **Government-introduced Avian Influenza vaccination** drive remains prohibitive for both the table egg and chicken industries and discussions are underway with the authorities in an attempt to remedy the current situation. The recent roll-out of a practical vaccination plan for Foot and Mouth Disease is encouraging in this regard.

Rainbow is cooperating with the **Competition Commission** in its inquiry which is focused on the perceived concentrated and integrated nature of the industry. The concern is that this may impede transformation and prevent fair competition. Integration and scale is key to low-cost production, which ultimately benefits the South African consumer. As mentioned in the Segmental Review above, international studies confirm that the local industry is globally competitive. The terms of reference of the inquiry were gazetted on 30 September 2025, however is yet to commence. It is expected that the inquiry will run for a period of 18 months.

The Board of Directors expresses sincere condolences to the Chubby Chick Fourie family, colleagues and friends, following the devastating and tragic death of brothers Johnathan and Deon Fourie. The Rainbow team’s sympathies are extended to the Fourie family members, as well as every Chubby Chick employee, supplier, customer, and all stakeholders affected by this loss.

The Board of Directors would also like to thank all employees for their contribution to the Group’s half-year results and respectfully acknowledges colleagues and families who have experienced loss of life in the service of Rainbow.

# OUTLOOK

Rainbow's future focus remains firmly fixed on managing its internal fundamentals by advancing the "Future Perfect Rainbow" strategy.

To successfully achieve its key business objectives, Rainbow is continually refining its five strategic pillars of operational efficiencies, competitive procurement, future proofing the business, unleashing our people's potential and delivering strong market-facing capabilities.

With the continued focus on cost containment and improved efficiencies, the Company expects to follow the same strategy for the second half of the financial year. The leadership team will continue to concentrate on what is in its control, including an unwavering focus on best-in-class farming practices, product quality, cost management, investment in infrastructure and an efficient asset base.

Chicken production in South Africa has grown at a rate faster than consumption over the past decade, despite significant local and global challenges. With a notable decline in feed prices and competitive production costs relative to other major producing countries, the South African industry could be poised to take advantage of growth opportunities. However, having replaced a substantial amount of imports since 2018, import replacement opportunities are becoming more limited and exports will be key to enhanced growth. In this context, ensuring that the business remains competitive in efficiency, cost and product diversity, as well as being compliant with Government regulations, is critical.

The operating environment within which Rainbow operates will continue to change. Ongoing risks include the impact of US tariff policies, volatile input costs and challenging South African trading conditions.

The Board is concerned about the recent developments in the Middle East and the potential impact on the business environment.

Avian Influenza remains a threat to the industry. Rainbow has proactively invested in upgrading key facilities and enforced strict biosecurity protocols to help mitigate the risk of any potential outbreaks. Recognising this as a risk to the entire industry, Rainbow collaborates with various industry stakeholders in an effort to collectively address this risk and implement appropriate and necessary actions.

As demand dynamics evolve in response to market conditions, Rainbow remains focused on innovation across its product offering to deliver affordable, quality protein and advance its purpose of *nourishing the nation*.

A key pillar for the business success is management's intense focus on people and driving a high-performing culture that delivers results.

Rainbow's separation from RCL FOODS has almost been completed, with the transition of a few key internal services expected to be finalised by the end of June 2026.

The Company remains steadfast in its ambition of being South Africa's market-leading, best-in-class and lowest-cost chicken producer.

# CASH DIVIDEND DECLARATION

The Board of Directors has approved a gross cash dividend of 15.0 cents per share (12.0 cents per share net of dividend withholding tax) for the period ended 28 December 2025.

The dividend has been declared from income reserves.

A dividend withholding tax of 20% will be applicable to all shareholders who are not exempt.

The issued share capital at the declaration date is 898 731 497 ordinary shares. The Company's income tax reference number is 9031711303.

The salient dates for the dividend will be as follows:

Publication of declaration data	Wednesday, 11 March 2026
Last day of trade to receive a dividend	Tuesday, 14 April 2026
Shares commence trading "ex" dividend	Wednesday, 15 April 2026
Record date	Friday, 17 April 2026
Dividend payment date	Monday, 20 April 2026

Share certificates may not be dematerialised or rematerialised between Wednesday, 15 April 2026 and Friday, 17 April 2026, both days inclusive.

# CONDENSED CONSOLIDATED INTERIM FINANCIAL RESULTS

FOR THE SIX MONTHS ENDED 28 DECEMBER 2025

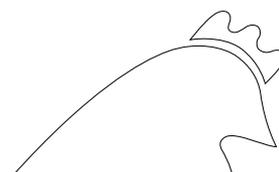

## BASIS OF PREPARATION

The condensed consolidated interim financial results have been prepared in accordance with IFRS<sup>®</sup> Accounting Standards ("IFRS") as issued by the International Accounting Standards Board and Interpretations as issued by the IFRS Interpretations Committee, the information required by IAS 34 Interim Financial Reporting, IFRIC<sup>®</sup> interpretations, SAICA financial reporting guides and circulars as issued by the Accounting Practices Committee, Financial Pronouncements as issued by the Financial Reporting Standards Council and in compliance with the Companies Act of South Africa and the Listings Requirements of the JSE Limited, under the supervision of the Chief Financial Officer, Kerry van der Merwe CA(SA). The accounting policies comply with IFRS<sup>®</sup> Accounting Standards and are consistent with those applied in the previous year and corresponding interim period. The interim financial results have not been reviewed or audited by the Group's auditors. The condensed consolidated interim financial results do not include all the disclosures required for complete annual financial statements prepared in accordance with IFRS Accounting Standards. In accordance with IAS 34 Interim Financial Reporting, we have included explanations of events and transactions which are significant to obtain an understanding of the changes in our financial position and performance since June 2025. The financial results for the period ended December 2025 have been prepared on a going concern basis.

<sup>1</sup> Finance costs paid exclude finance costs in respect of IFRS 16 Leases of R2,2 million (2025: R4,6 million), which have been disclosed as part of lease payments within financing activities. Total finance costs incurred were R16,0 million (2025: R15,9 million), which is the sum of finance costs incurred from operations and the loan from Green Create W2V SA Proprietary Limited ("Green Create") as well as finance costs paid in respect of IFRS 16 Leases. Finance costs under operating activities R8,7 million (2025: R11,4 million) relates to interest incurred and paid on the operational day to day activities of the business.

<sup>2</sup> The proceeds from the settlement of the loan were restated in December 2024. At the beginning of the 2024 financial year, the loan was recognised as a liability; however, following recapitalisation events, it transitioned primarily into a receivable. The outstanding balance was fully settled by RCL FOODS Treasury Proprietary Limited (a subsidiary of RCL FOODS Limited) on 01 July 2024, coinciding with the unbundling of Rainbow. As a result, the loan was restated and classified as a receivable at the end of the 2024 financial year. Accordingly, the loan balance was excluded from financing activities and included in investing activities in the December 2024 results to ensure consistency with the reported results for the June 2025 financial year.

# REVENUE FROM CONTRACTS WITH CUSTOMERS

These changes are disclosure-related only and had no impact on the amounts reported on the face of the financial statements.

<sup>3</sup> Property, plant and equipment additions include the right-of-use assets recognised in accordance with IFRS 16.

# FAIR VALUE ESTIMATION

## FOR THE SIX MONTHS ENDED 28 DECEMBER 2025

IFRS 13 requires disclosure of fair value measurements by level of the following fair value measurement hierarchy:

- Quoted prices (unadjusted) in active markets for identical assets or liabilities (level 1).
- Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) (level 2).
- Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs) (level 3).

The valuation technique used to measure the fair value of biological assets is the replacement costs of the components of growing the stock.

The fair value of trading derivatives is determined using valuation techniques. These valuation techniques maximise the use of observable market data where it is available and rely as little as possible on entity specific estimates.

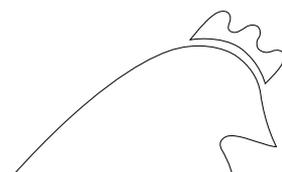

The fair value of forward foreign exchange contracts is determined using forward exchange rates at the statement of financial position date with the resulting value discounted back to present value.

The fair value of options are determined using appropriate option pricing models which take into account the volatility of the underlying instrument.

These techniques are consistent with those of the prior periods.

The following table presents the Group's assets and liabilities that are measured at fair value:

	Level 1 R'000	Level 2 R'000	Level 3 R'000	Total R'000

– share-based payments settled	25 545	7 899	10 249
– share-related expenses	228	3 221	3 220
	154 088	152 748	290 109
<b>Balances</b>			
– incentive benefits payable in the short-term <sup>7,8</sup>	254 481	178 005	271 921
<b>Total transactions and balances</b>	<b>408 569</b>	<b>330 753</b>	<b>562 031</b>

<sup>1</sup> Sales are conducted with subsidiaries within the Remgro Group, and mainly relate to the sale of goods. The sales reflected in December 2024 and June 2025 have been restated. The restatement is as a result of the omission of certain related party transactions that were only identified during the current period. This restatement had no impact on any of the primary statements for the periods ended December 2024 and June 2025. Sales was previously reflected as R15,4 million at December 2024 and R27,1 million at June 2025.

<sup>2</sup> Purchases are conducted with subsidiaries and associates within the Remgro Group. These relate to inputs purchased and services rendered within the Remgro Group.

<sup>3</sup> The management fees represent administration fees charged by subsidiaries within the Remgro Group for services rendered. The terms of payment related to these fees are 30 days from statement.

<sup>4</sup> Amounts receivable and payable to related parties are subject to trading terms ranging from 30 to 37 days from statement.

<sup>5</sup> Short-term employee benefits have been restated to reallocate the Short-Term Incentives payable as a separate disclosure within incentives benefits payable in the short-term. The previously disclosed amount was R112,4 million.

<sup>6</sup> These benefits reflect the accrued LTI (VCP) and Long-Term Incentive Plan (LTIP) incentive schemes for the current financial year, which are allocated for disbursement in future financial periods and are potentially due and payable beyond a 12-month period. The December 2024 allocation has been restated to reallocate the short-term portion to incentive benefits payable in the short-term. The previously disclosed amount was R145,7 million.

<sup>7</sup> These benefits relate to incentive payments scheduled for September and represent a combined accrual for management Short-Term Incentives (STI) and Long-Term Incentives (LTI) under the Value Creation Plan (VCP).

<sup>8</sup> To ensure consistency in reporting, additional disclosures have been incorporated into the comparative period (December 2024). These enhancements contribute to improved transparency and elevate the overall quality of the disclosures.

# SUBSEQUENT EVENTS

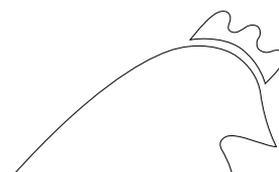

FOR THE SIX MONTHS ENDED 28 DECEMBER 2025

No events took place between the ending of the interim reporting period and the date of issue that would have a material effect on the interim financial results other than the dividend declared as noted on page 8.
